Reconstructed Stones -- "The German Block"

This is an **introduction** about reconstructed Gems Stones

And is intended to be for everyone who is interested

In this Topic.

Pages in this folder are:

- **Product Information** (*1st and 2nd page*)
- **Pics of the Product** (*3rd page*)
- **Price list for rough stones** (*4th page*)
- **Price list for cut stones** (*5th page*)

Product Information

Since 1968, our managing director, *Klaus E. Kappler* is engaged in the production of **Reconstructed stones**, which has been developed in the 60's by a Hungarian doctor of Chemistry, with whom *Mr. Kappler* co-operated. This resulted into an own production of these stones in 1968 under the name of the company:

"RECON-PRODUCT-KAPPLER K.G."

Being located near to the city *Idar-Oberstein/Germany*, which is a most famous and well-known area for gemstone cutting.

When *Mr. Kappler* decided, to move parts of his factory to *The Kingdom Of Thailand*, he moved that part of production to a friend in *India*, who continues, to manufacture these stones.

K.E.K. GEMS INTERNATIONAL CO., LTD.

Took over the world agency for these stones and co-operates with the actual Producer and partner.

These stones are different from all others, which appeared in the market since the 70's when many companies tried to copy this product with little success. None of them could manage to manufacture a product, which met the same strict criteria of "***Reconstructed Stones - The German Block.***"

Our stones have been made until 1985 with 100% of the compounds and properties that the natural counterpart has.

Since then we decided to switch some of the compounds to "*healthier*" ones.

So are we using in the Turquoise, instead of the most poisonous Copper, an Aluminum Oxide or a Calcium Carbonate, so as an iron oxide (for the color).

Our clients do honor this better, than the knowledge, that it's ALL "as is in the real stone."

Our product is *NOT a natural stone.*

It is intended to be *the best substitute* of its natural counterpart.

We are proud to say that it still, after 38 years! ***IS the very best!***

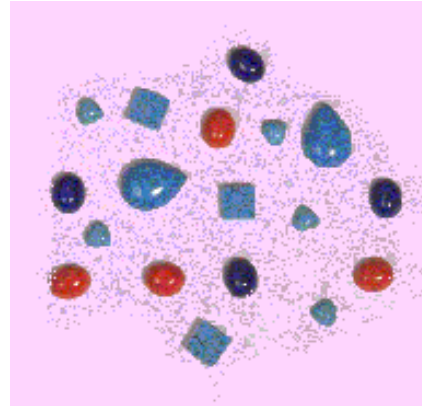

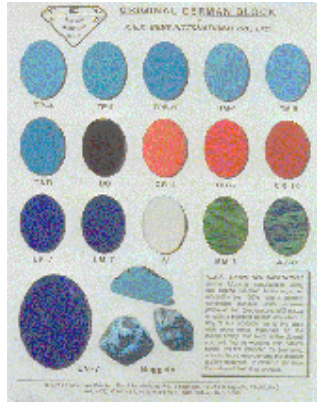

This product is ***NOT*** intended for everyone, but for these, who ***do care*** about a ***quality product*** and who are proud of their work and of their products, which they sell.

Jewelry in fact is ***Beauty*** - And ***Beauty*** is what we sell!

We thank you for your interest and your attention and hope to welcome you as a client soon. These *fine stones*, we supply in rough and in cut. The *rough* is available *ex our large stock* in Bangkok while *cut stones* are cut on *orders only* by german machines to perfection at Thai prices.

Klaus E. Kappler, managing director of
K.E.K. GEMS INTERNATIONAL CO., LTD.
